(a) Device context

Native: 4 GiB · Web: 8 GiB

Global threshold

8 GiB limit

8 = 8: no trigger

Web 8 GiB

Native-derived envelope

4 GiB bound

Web 8 GiB

8 > 4: trigger

Plausible alone, incompatible together

(b) Legitimate co-change

Offsets in the same sign convention

Normal system change

Native	*a*	→ *b*	match
Web	*a*	→ *b*	

Web-only edit

Native	*a*	→ *a*	differ
Web	*a*	→ *b*	

Distinct offsets a and b illustrate the two cases.

Separate co-change from a local edit

(c) Container context

Standalone study

Host View

Reported viewport
after unit conversion

Host size H

Viewport size P

P > H + ε: trigger

Check dimensions against the container

Illustrative examples on valid, applicable inputs; quantitative results are reported separately.
